

## **Thanks to EWM Volunteers Summer 2022**

***The Eurasian Watermilfoil Working Group was fortunate to have over 20 volunteers directly help this summer with EWM control efforts. On several days in August, these volunteers gave generously of their time to move river rock from shore to floating work platform, unroll 150' burlap mats, cut them in half, re-roll then place in the water for soaking. Additionally, over the 3 consecutive days of dive activities, we had numerous skimmers in kayaks, canoes and boats scooping up milfoil fragments before they could disperse around the lake. In appreciation, the Working Group held a draw among all the volunteers for a Lighted Bocce Ball set. From the hat, the name of Jen Chunik was drawn. The picture shows Jen and her 3 other family members who also contributed their time to the efforts: Steve Campbell and twins Abbey and Piper.***

***All volunteers should take a bow and accept our thanks. Because of you, this year's Watermilfoil control endeavours appear to have been exceptionally successful. We look forward to your continuing help in the summers to come.***

***EWM Working Group, DSLPOA***
